

Introducing iPECS2Teams

Simplify your business with a reliable, cloud-based enhancement to iPECS Cloud that adds the power of Office 365

Collaboration and teamwork are redefining voice

- 12 million new remote users of Teams during the COVID-19 pandemic
- Up to a 50% increase in collaborative work
- Almost 80% of employee time is spent collaborating
- Approximately 62% of users connect to meetings using mobile phones
- It is estimated that 72% of workers will be working remotely by 2021

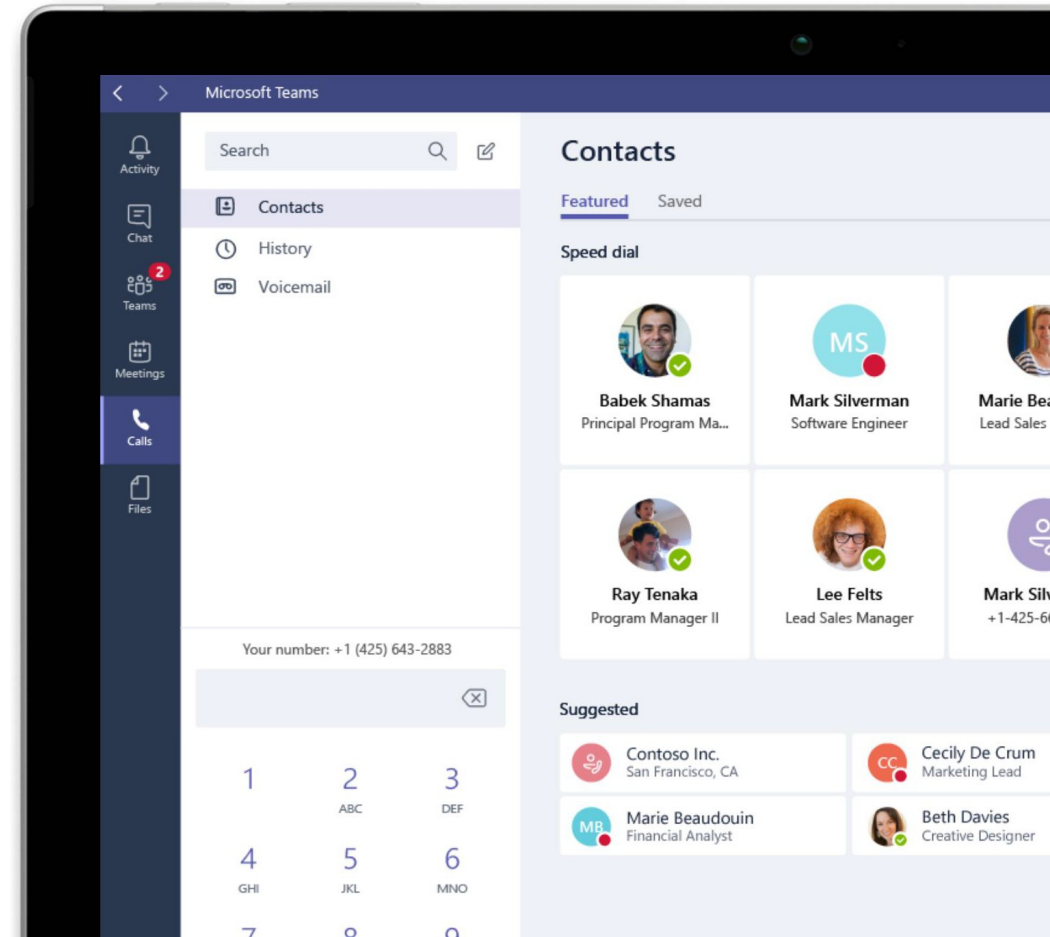

**Your business needs a modern
voice solution that combines
Unified Communications and
teamwork**

Collaboration & Native Calling in Microsoft Teams

- The best of both worlds
 - Teams users retain collaborative, interactive experience with other Teams users
 - Make and receive business calls in Teams while at home or on the road, from Android and iOS
- Routing all external voice traffic through iPECS Cloud ensures every user can make and receive calls – a true end-to-end voice solution
- Collaboration and Voice Together: iPECS2Teams enables the ability to call when and where your users need – encouraging working together

Enhance iPECS Cloud with Office 365 and iPECS2Teams

Unify iPECS Cloud with Office 365: A complete voice solution is possible with a combination of iPECS Cloud and Office 365 to provide an integrated voice solution in the cloud.

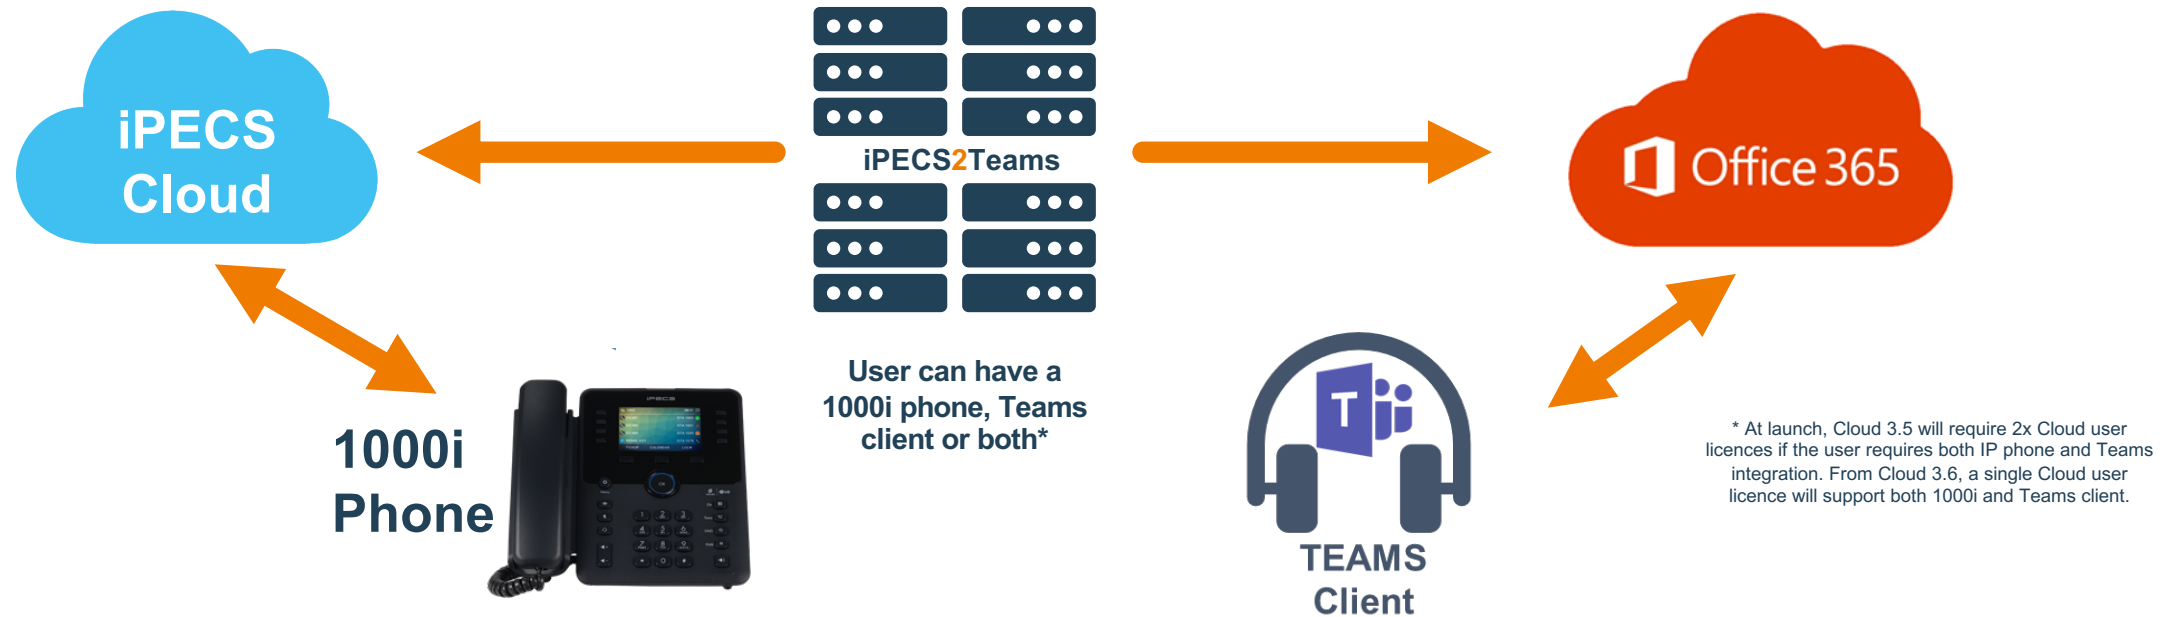

Low Investment: Bring new functionality to iPECS Cloud.

Simplify IT: Increase agility and consolidate management with rapid provisioning and deployment of the voice services in Office 365.

Scale Globally: Connect iPECS Cloud to the Microsoft worldwide network, and get the power of the Microsoft cloud wherever your business goes.

How iPECS2Teams connects your phone system to Office 365

* At launch, Cloud 3.5 will require 2x Cloud user licences if the user requires both IP phone and Teams integration. From Cloud 3.6, a single Cloud user licence will support both 1000i and Teams client.

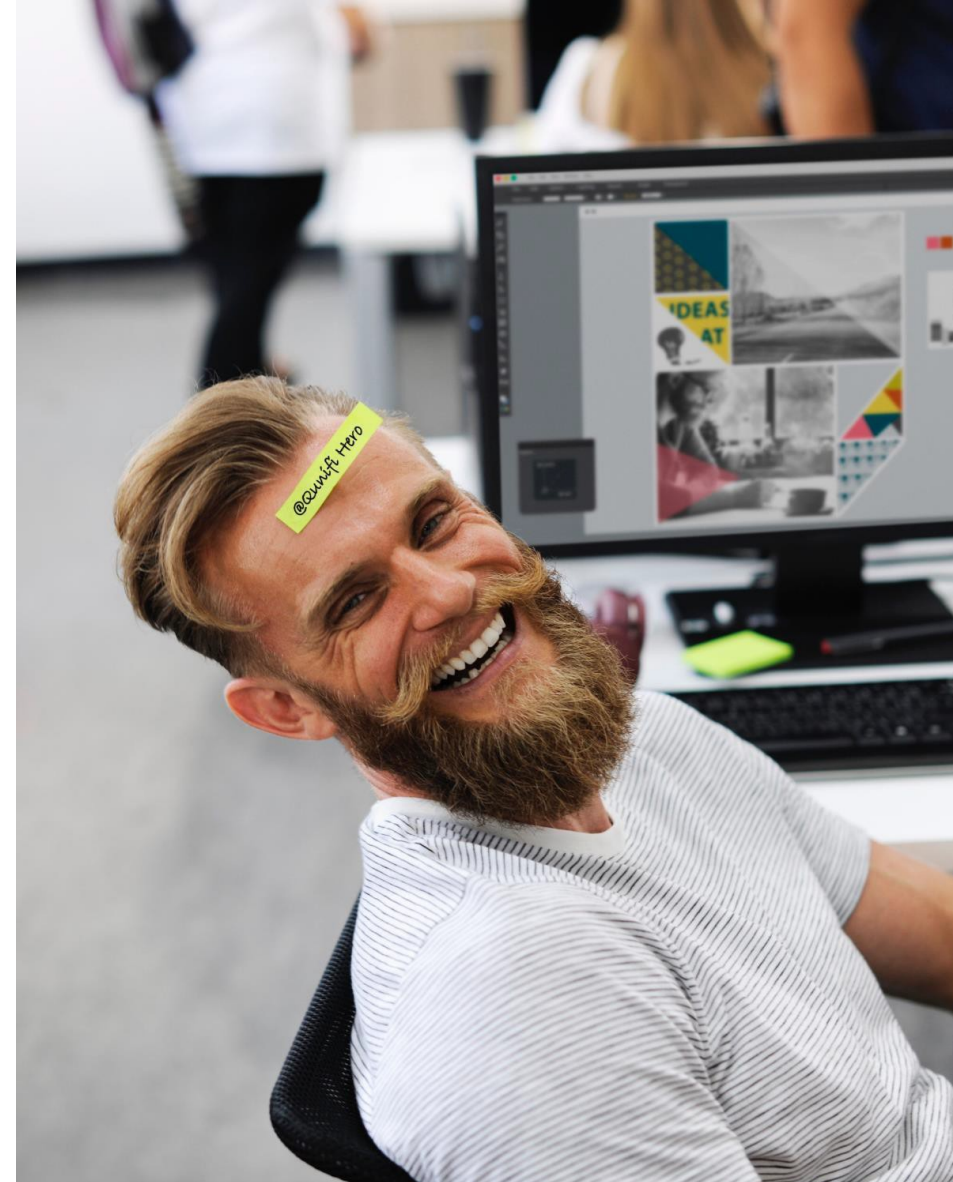

- iPECS2Teams provides a simple link between iPECS Cloud and the Office 365 Teams platform.
- No special configuration of iPECS Cloud is required, ensuring that you retain any compliance features like call recording and reporting.
- No number porting, end user training or complex reconfiguration is required.
- Teams users get to make and receive calls just like on their existing desk phone.
 - Please note, at initial launch any user who requires a desk phone and integration for their Teams client to iPECS Cloud and will require 2 iPECS Cloud user licences which will also mean that they have 2 distinct extension numbers. This will change in Q4 2020 where only 1 user licence will be required.
- New Teams user integrations can be added as and when required.

Simply connect iPECS Cloud to Office 365

Keep everything the same: iPECS2Teams means you can keep all your phone numbers, extensions and call-flows untouched.

No hardware or software required: iPECS2Teams is a true multi-tenant cloud service, you simply use it on a per-user subscription basis.

iPECS2Teams is enterprise grade and fully integrated: Built for resilience and high availability, the iPECS2Teams platform is designed with business in-mind and is distributed across multiple global data centres with a service organisation to match.

Start using iPECS2Teams today

- ✓ 30-day, 25-user trial available*
- ✓ No change to your phone system
- ✓ Add one user at a time
